

**WELCOME TO
EUROMEDICA DIALYSIS CENTRE**

 **GENERAL INFO**

Before Traveling

1. It is imperative for travelers to consult their attending doctors to assess their fitness for travel.
2. Advanced booking for dialysis appointments is necessary.
3. To facilitate communication, our Dialysis Centre will send the traveler form or it can be downloaded from the clinic's website.
4. The patient would need to fill out the traveler form and send it back for medical evaluation.
5. After our Nephrologists have evaluated the medical status on the traveler form and requested documents, we will confirm and assign appointments for the duration of your stay in Rhodes.
6. Wishing you Safe travel, see you in Rhodes!

Our Services:

- Wi-Fi
- TV
- Magazines & Newspaper
- Transport service available, upon request (with extra charge)
- Catering from our Cafeteria (with extra charge)
- Specialised Checkups (with extra charge)
- Supportive education for the patient's family members

We offer a convenient location in the heart of Rhodes (Between Rhodes-Lindos) with a max. transfer time of 60min from any hotel.

Welcome to Rhodes

Patients who are stable on dialysis can travel to other countries, for business, family reunions or sight-seeing. We encourage tourist dialysis as it significantly improves patients' quality of life.

With our new established Dialysis Centre in Euromedica, Rhodes is now a destination with the latest Dialysis Technology and Clinic Facilities available, that can serve dialysis patients during their vacation on the Island. In line with our philosophy of convenience, compassion and comfort, the Euromedica Dialysis Centre offers an empathetic environment with the best facilities.

Our Renal Care has also a separate arrangement for Hep-B positive patients who are undergoing dialysis treatment. Patients can undergo treatment without getting hospitalised, making them feel relaxed.

We also provide Pre and Post treatment care and most importantly 24/7 medical assistance along with state of the art emergency facilities.

Technical Details:

Our dialysis centre uses 17 Gambro artis physio dialysis machines. The water sterilisation mechanism, with reverse osmosis, was designed by Temak. This consists of two individual membrane systems, pumps and softeners, to remove the risk of breaks and delays in the centre operation. The centre has its own 65kv generator.

We accept the European Health Insurance Card (EHIC).

Be Smoke - Free

Smoking reduces the efficiency of your medicines.

Be In Control

Monitor your blood pressure & sugar periodically to remain in control.

Be Active

Regular exercise strengthens you to combat weakness.

Be Hydrated

Normal = 2500ml Vs CKD = 750ml
